ambient solutions

WE ARE AN INNOVATIVE TECHNOLOGY LAB SPECIALIZING IN BRAND
EXPERIENCE THROUGH AR/VR AND INTERACTIVE APPLICATIONS

ambient solutions

Technical Expertise

AR : Hololens , ARKit, Android and iOS and Web based augmented reality applications.

VR: Oculus, GearVR, Vive, Cardboard. Using Unity3D and Unreal. We can create interactive applications, solve tough problems, and write high performance shaders for VR.

Large scale installations: We have extensive experience in architectural / spatial interactive apps. We can work with architects to design and implement responsive and interactive applications, projection mapping, LED walls, etc., in pretty much any space.

3D content: 3D content for AR, VR and any 3D applications. We can also provide content creation.

We can create backend and front end apps, and collaborate on the creative side as well.
